ROECSG is excited to announce our latest Executive Board members:
- Resident Representatives: Christian Fernandez, Elizabeth Jeans, Anna Laucis, and Bailey Nelson
- Faculty: Ravi Chandra

ROECSG is excited to share that our 2020 Spring Symposium "Education for the Future of Radiation Oncology" was a huge success. Due to the ongoing pandemic, the meeting format was entirely virtual. However, we are happy to share that we had our largest number of attendees yet, with over 285 registered attendees from 20 different countries.

We very much value the feedback you have provided in the post-symposium survey and plan to make changes based on this feedback to continue to provide the best meeting experience for everyone in future Spring Symposiums.

All of the meeting content, including recorded presentations and keynote speech, are available at: [https://roecsg.org/events/symposium2020](https://roecsg.org/events/symposium2020)
Project Spotlight

Delphi Consensus Development of a United States Radiation Oncology Curricular Framework and Entrustable Professional Activities

The Leadership Committee (picture below) for the ROECSG Core Curriculum Project has been diligently working over the past 6 months to develop an initial list of content domains, percent apportioned during training years, and entrustable professional activities to guide a framework for standardization of radiation oncology curriculum and assessment in the United States. The next step of this project includes a rigorous evaluation of these products (Delphi Method) to gain a unified consensus across the United States radiation oncology community. Although this project is focusing on United States radiation oncology education, we anticipate the final product will be applicable for radiation oncology education internationally. Please keep a look out and sign up for possible participation in this project.

Opportunities for Getting Involved

ROECSG encourages active participation in our collaborative study group. We are in the process of establishing committees to allow for even more engagement from our members. If you are interested in learning more about opportunities for getting involved with ROECSG and joining one of our new committees, please feel free to contact us anytime at: https://roecsg.org/contact. Make sure to follow us on Twitter!
Ongoing medical education initiatives

ROECSG members are involved in multiple ongoing medical education initiatives. The full list of ongoing projects can be accessed at: https://roecsg.org/current-initiatives

- Development of a structured medical student clerkship curriculum
- Introductory Radiation Oncology Course (IROC) for Residents
- Simulation-based education for radiation oncology contouring
- Residents-as-Teachers (RAT) in Radiation Oncology
- Self-directed treatment planning/dosimetry training for the clinical radiation oncologist
- We are also collaborating with eContour.org to develop novel contouring educational tools for radiation oncology
- ROECSG Core Curriculum: https://roecsg.org/corecurriculum

Recent #RadOnc #MedEd Publications

The following represents a list of recent education-related publications. There is a lot of exciting work in this space! If you would like your publication featured in the next ROECSG Report, please email the citation to Anna Laucis at: anna.laucis@gmail.com
